That, on the other hand, Governor Monigue, for years in public addresses, and even in an official message, advocated as the such system of election;
That you have every reason to believe that in obtaining the desired and necessary amendment to the United States Constitution you would have far more assistance from one who has advocated the principle and helped forward the object, than you would from one whose feelings are not with you.

Prom these facts you are justified in believing:

reclings are not with you.

Prom these facts you are justified in believing:

That the defeat of Governor Montague and the success of Mr. Martin would be used as an argument by the party managers in alleging that the people do not desire such primary elections:

That that argument, together with the wishes of the reluctant and belated supporters of the primary, would result in the party managers abolishing primary decidions for United States senators and State officers;

That if you should vote for Mr. Martin, and he should by any possibility be nominated, you would have helped to take away the greatest safeguard which the cople now have as to the selection of their rulers;

COLD SULPHUR SPRINGS, VA., August 19.—The season at the Cold Sulphur has reached its climax, and with tennis, bowling, friving, fishing, card and dancing parties, by day and by night, all goes merry as wedding bells, which, from appearances, will ere long be rung in real sarnest. To describe each of the many social functions in all their detail and elaborateness would require more of your space than your correspondent has the temerity to ask or effrontery to expect, and must therefore content himself with generalities, because to mention one would be at the expense of another.

The tennis and bowling tourneys are stoutly contested, and very attractive; the card parties, a drawing card, and dancing a merry feature with those who love that entertaining diversion. Fishermen, however, are perhaps the most noteworthy of all the contestants for honors, noted especially for fisherman's luck, which is to always leave to big fish behind, and a fisherman's proclivities, which I leave to your wondering imagination.
